Area

Course

Course

FNR-52

Outcome

Lab Specific Outcome: Analyze field data and generate appropriate maps and reports.

A. Describe the impact of implemented changes and how they were measured (Close the Loop).

We replaced the outdated equipment this year and were successful in integrating these tools into the lab. While the outcome averages did not change, it is significant that they didn't decline more because of the lab cancellations. There is still room to better integration of the equipment that should come with more faculty development and familiarity with the new equipment.

B. Check if actions/changes are indicated. Use the text box to describe what they are, and how they will be implemented.

We have included a resource plan in Program Review to replace the older Total Stations with newer models.
